Unleaded Gas
Clean Fuel: The Early Days

2000

Saudi Aramco begins reducing the lead content of its gasoline.
Saudi Arabia introduces unleaded gasoline into the domestic Market

“The switch to unleaded gasoline removes a significant pollutant from our air,” said then Saudi Aramco president Abdallah S. Jum‘ah. “This step demonstrates our company’s longstanding commitment to the environment not only in our areas of operation but in the world at large.”
All service stations in the Kingdom offer only unleaded fuel, the target date set by the Gulf Cooperation Council member countries.
