Adel S. Al-Ghamdi is a senior process engineer and a flare & Relief Systems Specialist working at Saudi Aramco; Environmental Protection Department of Saudi Aramco. He holds a bachelor degree in chemical engineering with minor in chemistry obtained in 1997 from New Mexico State University, USA.

He holds about 27 years of experience with Saudi Aramco in the area of Process Engineering. Adel is also the company official delegate to the Kingdom's team at the Global Methane Initiative (GMI).

He also functions as the company's technical expert in evaluating the World Bank's Zero Routine Flaring Initiative (ZRF by 2030).

Adel's experience varies from handling refineries, gas plants, NGLs, Gas Oil Separation facilities, loss prevention and projects management, to undertaking specialized assignments with reputable flare systems and process safety management consultants such as John Zink and Siemens Inc. in USA.
